

CWT 160

cut out template

Diameter: 170mm (6 11/16")

How to use this template:

- 1) Remove the Protective backing from the "low tack" adhesive tape on rear of this template.
- 2) Align centre lines.
- 3) The outside profile is an accurate indication of the speaker box hole required.
- 4) Draw around the profile, remove template and cut hole.
- 5) The template can be repositioned a number of times if required.
